

Farmers Seeking Solutions Forum

Connection between Ag Nutrients and Water Quality

Monday, September 22, 2014 • 1:00 p.m.

Forrester's on the River, Boers-Boyer Way (26 Main Street), Toledo, Ohio
The Docks at International Park, downtown Toledo | Maumee Riverfront | Free Parking

Presenters

Jeffrey M. Reutter, Ph.D., Director, Ohio Sea Grant College Program & F.T. Stone Laboratory

Todd Hesterman, Henry County Farmer & NW Ohio Coordinator of Conservation in Action Program (CAP)

Gregory A. LaBarge, Field Specialist, Agronomic Systems, OSU Extension

Adam Rissien, Director, Agricultural & Water Policy Program, Ohio Environmental Council

Moderator:

Joe Logan, President, Ohio Farmers Union

PRE-REGISTRATION APPRECIATED ~ FREE & OPEN TO THE PUBLIC

Register or for more information call Ohio Farmers Union
800-321-3671 or email Linda Borton - lborton@ohfarmersunion.org

Farmers Seeking Solutions Forum

Agriculture is a major driver of Ohio's economy and northwest Ohio is a key region for Ag production.

Farms dominate the landscape in the western Lake Erie watershed and farmers use many tons of phosphorus and nitrogen to grow crops, so people naturally look toward agriculture as a contributor to Lake Erie's excess nutrient loads.

Farmers always try to keep nutrients on their land, but the increasing intensity of rain storms make doing so more challenging, farmers may need to embrace new management and new technology.

Groups of farmers and scientists have been working together to test new farm practices for many years.

Please join us at this important event to learn more about the connection between Ag nutrients and water quality, and to explore management systems that conserve soil and can help to save Lake Erie.
